

About Cynngn

Cynngn develops and deploys scalable, differentiated autonomous vehicle technology for industrial organizations. Cynngn's self-driving solutions allow existing workforces to increase productivity and efficiency. The Company addresses significant challenges facing industrial organizations today, such as labor shortages, costly safety incidents, and increased consumer demand for eCommerce.

Cynngn's DriveMod Kit can be installed on new industrial vehicles at end of line or via retrofit, empowering customers to seamlessly adopt self-driving technology into their operations without high upfront costs or the need to completely replace existing vehicle investments.

Cynngn's flagship product, its Enterprise Autonomy Suite, includes DriveMod (autonomous vehicle system), Cynngn Insight (customer-facing suite of AV fleet management, teleoperation, and analytics tools), and Cynngn Evolve (internal toolkit that enables Cynngn to leverage data from the field for artificial intelligence, simulation, and modeling).
